

# POST-BUSH Time Replacement Arrow

working with light to  
restore lost time

Regain **LOST TIME**, time spent without hope, humor or insight; time waiting for time to pass between January 2001 and January 2008. The last 8 years of collective time loss, have altered the Fine-Structure Constant in ways we do not completely understand. Scientists believe it is possible the FSC will stabilize now along with the EPA, FDA, FCC and FDIC **BUT Please follow directions carefully to align your arrow. We can not afford a re-occurrence.**

**NOTE:** In the event of acceleration in excess of the speed of light, Chronic Hovering or use in locations off the known grid, some variables may occur to cause an alteration in the course or trajectory of the arrow and quality of time replaced

**IN EVENT OF EMERGENCY PLACE UNDER GLASS, HANG ON WALL, SIT QUIETLY**

**Big bang**

**Nearby galaxy**

**Quasar**  
12 billion light-years  
(12 billion years ago)

**A remarkable phenomenon. I use the T.R. Arrow everyday**

**Millions of light-years away**  
(Millions of years ago)

**Shift in starlight spectra from nearby source**

**The hypothesis**  
Scientists try to determine whether the fine structure constant is truly "constant" by comparing ① light from interstellar clouds near quasars on the edge of the universe with ② light from lab experiments and nearby galaxies. Some observations show subtle shifts in the spectra of light from the edge of the universe and thus hint that the so-called constant has changed over time.

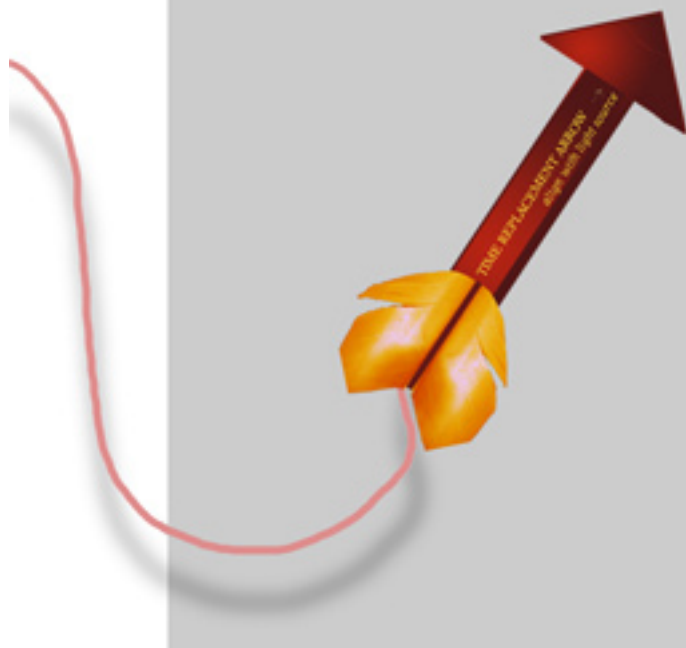

**Small details, big changes?**

**Fine structure constant explained**  
The "fine structure constant" controls the strength of electromagnetism, of which light is the visible manifestation. Thus, the fine structure constant controls the way light and matter interact.

**Evidence of change?**  
Subtle shift in positions of spectra suggests that the fine structure constant in distant cosmos differs slightly from the constant on Earth and in nearby space.

**Keck telescope**

Brought to you by Corey Hitchcock in collaboration with the P.U.D. Cons November 2005

Instructions: Cut out your POST BUSH Time Replacement Arrow document and your arrow.

Attach your Arrow to the main document with a short string and tape or glue. Place in a prominent location. Be sure to align the point of your Arrow with the sun, our source of eternal light, for best results.

Please feel free to share this print out location with others.
